

Restoring Coral Reefs:

A Mission of Environmental Stewardship

Sumitomo Mitsui Trust Bank (Thai) PCL(“SMTBT”) is committed to environmental sustainability and community engagement. In line with this commitment, we recently organized a **“Coral Restoration Activity”** on February 3rd, 2024 at Marine Science and Conservation Camp, Chon Buri, Thailand.

This initiative, aimed to restore coral reefs, crucial for marine biodiversity and coastal resilience. Coral reefs face threats from climate change, making restoration efforts essential for their survival. Participants engaged in hands-on coral restoration, fostering teamwork and a deeper connection to marine ecosystems. The event not only contributed to environmental conservation but also served as a unique team-building opportunity.

In the spirit of environmental preservation, SMTBT is proud to take meaningful steps toward a healthier and more resilient planet.
